# PATHA RITHIKA

*B.Tech · CSE – Artificial Intelligence & Machine Learning*

rithikapatha1310@gmail.com | +91-8309663919 | GitHub | LinkedIn | Portfolio

## PROFESSIONAL SUMMARY

Results-driven B.Tech graduate in Computer Science Engineering (AI & ML) with hands-on full-stack development experience across web and mobile platforms. Proven ability to architect and ship live applications using the MERN stack, React Native, and scalable backend services. Skilled at delivering real-world solutions with a strong foundation in JavaScript ecosystems, RESTful APIs, database management, and cross-platform mobile development.

## EDUCATION

**B.Tech – CSE (AI & ML)** · **Kommuri Prathap Reddy Institute of Technology, Hyderabad** *2021 – 2025*

*CGPA: 7.3 / 10*

**Intermediate – MPC** · **Sri Gayatri Junior College** *2019 – 2021*

*Score: 800 / 1000*

**10th Standard – SSC** · **Krishnaveni Talent School** *2018*

*GPA: 9.5 / 10*

## WORK EXPERIENCE

**MERN Stack Developer** · **Brandwar** *Dec 2025 – Jun 2026 · Full-Time*

- Engineered and deployed full-stack web applications using React JS, Node.js, Express.js, PostgreSQL, and Tailwind CSS.
- Maintained and enhanced live production applications, ensuring high performance, reliability, and seamless user experience.
- Constructed a WhatsApp messaging service using the whatsapp-web.js package, incorporating it with the Node.js backend API.
- Built cross-platform mobile applications (APKs & iOS builds) using React Native for Android and iOS.
- Collaborated on feature delivery, code reviews, and third-party API integrations across the team.
- Built cross-platform mobile applications (APKs & iOS builds) using React Native for Android and iOS, with successful deployments published on the Google Play Store and Apple App Store

**React JS Developer Intern** · **Robowaves** *Oct 2025 – Nov 2025 · Completed*

**Project: Aurra – Blog Application**

- Constructed Aurra, a full-featured blog application with create, edit, delete, and view post functionality.
- Built with React, Redux, and Tailwind CSS — featuring a clean, responsive UI and smooth API integration.
- Implemented scalable architecture to support future feature expansion.

## TECHNICAL SKILLS

**Frontend**

- HTML, CSS, JavaScript, React JS, Tailwind CSS, Redux, Figma

**Backend & Databases**

- Node.js, Express.js, Django, Python, SQL, PostgreSQL, Prisma ORM

**Mobile Development**

- React Native – Android (APK) & iOS cross-platform application development

**Services & Tools**

- WhatsApp API, Beekeeper Studio, REST APIs, Git, GitHub, SDLC

## CERTIFICATIONS

- RPA (Robotic Process Automation) – Infosys ICT Academy | Sept 2024
- Software Development Training (HTML, CSS, JavaScript, SQL, React JS, Python, Django, Node.js) – QSpiders, Hyderabad | Nov 2025

## PROJECTS

### WhatsApp Integration Service *Jan 2026*

- Constructed a WhatsApp messaging service using whatsapp-web.js, incorporated with a Node.js/Express backend.
- Enabled automated message sending, receiving, and event-driven notifications for live business workflows.
- Linked with REST APIs to trigger messages based on real-time application events.

### Realgo – Real Estate Marketing App *2026*

- Architected a full-featured real estate platform for marketing plots, managing property listings, tracking sales pipelines, and handling finance records end-to-end.
- Built modules for property browsing, enquiry management, plot availability tracking, and agent-level sales reporting with a clean dashboard interface.
- Incorporated finance management features for payment tracking, installment schedules, and transaction history per customer and plot.
- Engineered using React JS, Node.js, Express.js, PostgreSQL, and Tailwind CSS with role-based access for admins and sales agents.

### Yug Montessori School – School Management System *2026*

- Built a comprehensive school management system handling student records, class data, fees, attendance, and events across three role-based modules.
- Principal Module: Full admin control to oversee student admissions, class structures, staff records, fee configurations, and school-wide reports.
- Teacher Module: Allows teachers to mark and manage daily attendance with class-wise views and historical records.
- Parent Module: Parents can view their child's profile, track attendance, stay updated on school events, and make fee payments directly through the app.
- Engineered using React JS, Node.js, Express.js, PostgreSQL, Prisma ORM, and Tailwind CSS with secure JWT-based role authentication.

### E-Commerce Website *Nov 2025*

- Constructed a fully functional e-commerce platform with product listings, cart management, and checkout flow.
- Built using React JS, Tailwind CSS, and Node.js with seamless backend API integration.

### Heavenly Bakes – Bakery Website *Jul 2025*

- Created a dynamic, user-friendly bakery website featuring intuitive navigation, cart management, and automated bill generation for an enhanced customer experience.

### Early Cardiovascular Disease Detection using ML *Dec 2024 – Feb 2025*

- Built a machine learning system to predict early-stage heart disease using patient health data including age, BP, cholesterol, and glucose levels.
- Applied data preprocessing and SMOTE to address class imbalance and improve prediction fairness.
- Created a Tkinter-based GUI for intuitive data input and real-time disease risk prediction.

## LANGUAGES & INTERESTS

- Languages: English, Telugu, Hindi
- Interests: Cooking, Listening to Music, Playing Sports, Interacting with People
